

Hi,

So good to see you at home, and thanks for the CD, I listened to it last eve. Great. I was especially moved by 'down the river', as I had just found out about your sudden loss there. Also love and appreciate your expressions of love, for each other, family and the planet.

all best, Anna

AND

Hi there, can you believe it? I opened this (CD release concert invitation) while listening to your CD. I love it, and wanted to hear it again before (finally) sending it off to today.

Besides how moving "Down the River" is, it really is a song about climate change and how it can hit 'out of the blue' -- love Mother Nature saying "pay attention!" Thanks...

xx anna
